

Sentinel LDK版本 正式开发号例子程序运行

武汉SafeNet金加和店

1、打开导入主锁库文件存放目录我的文档

C:\Users\Administrator\Documents\SafeNet\Sentinel LDK

7.3\API\Runtime\Cpp\msvc10,

 libhasp_cpp_windows_msc10	2014/2/24 15:05	Microsoft Visual Studio Solution	4 KB
 libhasp_cpp_windows_msc10	2014/2/24 15:05	VC++ Project	35 KB
 libhasp_cpp_windows_msc10.vcxproj	2014/2/24 15:05	VC++ Project Filters File	4 KB

点击“生成”，在当前目录下生成一个文件夹：Debug_LIBMT_Diag，将里面的文件libhasp_cpp_windows_mt_msc10_d.lib文件放到例子程序目录：C:\Users\Administrator\Documents\SafeNet\Sentinel LDK 7.3\Samples\Runtime\cpp\msvc10下；

2、打开C:\Users\Administrator\Documents\SafeNet\Sentinel LDK

7.3\API\Runtime\C\win32，将libhasp_windows_106181.lib文件放到例子目录：C:\Users\Administrator\Documents\SafeNet\Sentinel LDK 7.3\Samples\Runtime\cpp\msvc10下；

3、打开例子程序C:\Users\Administrator\Documents\SafeNet\Sentinel LDK 7.3\Samples\Runtime\cpp\msvc10，将Hasp_demo_10设为启动项，修改vendor_code.h密钥（正式号主锁导入后，密钥存放目录：C:\Users\Administrator\Documents\SafeNet\Sentinel LDK 7.3\VendorCodes，用记事本方式打开复制好）

```
1  /* HASP vendor code for demo keys

```

这是正式号.hvc密钥

4、打开项目—属性—配置属性—链接器—输入，添加好刚才的lib文件，

点击“生成解决方案”，然后“启动调试”即可打开对应的界面：

```
C:\Users\Administrator\Documents\SafeNet\Sentinel LDK 7.3\Samples\Runtime\cpp\msvc1...
